

Establishing a ClimateWatch Trail

Thank you for requesting more information on how to establish a ClimateWatch Trail. Educational, non-profit and community groups receive subsidised charges. Please see the table below or contact us for more information.

Contributions from Earthwatch

Earthwatch provides the following when establishing a ClimateWatch Trail:

Setup:

One ClimateWatch trail created for \$12K (two trails for \$20K). This includes:

1. One face-to-face site visit to help establish trail sites and identify species
2. Set up of ClimateWatch trail materials (webpage, recording sheet and trail-specific field guides and recording sheets)
3. Ability to include 2 additional species per trail (i.e. local species which may not be on the program's monitoring list currently; addition of new species is subject to the Science Advisory Panel approval)
4. Training for staff in the program, so they can engage the community
5. A communications toolkit to help activate the trails
6. An Earthwatch sustainable behaviour change toolkit to provide to trail users
7. Information provided for signage
8. For 2 years: annual report provided by Earthwatch

Ongoing:

- Data hosting
- Technology support for ClimateWatch Android and iOS apps and website
- Data validation of ClimateWatch records
- Data submission to Atlas of Living Australia
- Raw data upon request
- ClimateWatch summary in Earthwatch Annual Report

Indicative timeline for development of a ClimateWatch trail is 4 to 6 months.

Contributions from trail coordinators/clients

To support the development and activation of the trails, you would assist in providing the following:

- A high-resolution map detailing the trail area, if available
- A list of the ClimateWatch indicator species which are present along each trail
- Background information for the trail webpage (see bit.ly/cwtrails for examples)
- All appropriate logos, along with specifications for appropriate display of logos
- Signage and markers along the trail

Earthwatch is a not-for-profit organization. All fees are put back into our organisation to help provide free, long-term, accessible citizen science tools and resources for the whole community. We appreciate the support you give us!

* Educational, non-profit and community groups receive reduced charges (\$4.5K). This cost does not include the additional of new species or site visits, however ongoing costs are significantly waived.

ClimateWatch Trail Deliverables 2019-2021	Year 1 2019/2020	Year 2 2020/2021	Ongoing
Site visits	7,000		
ClimateWatch trail materials <ul style="list-style-type: none"> • webpage • species field guides including ability to add 2 local species* which may not be on the program currently • recording sheet • communications toolkit • Earthwatch behaviour change toolkit to provide trail users • information for signage 	3,000		
Training of staff or community members in climate change impacts, ClimateWatch monitoring and species ID (workshop design and delivery)	800		
Annual report to trail partners	200	0	
Technology maintenance , hosting and support (webpage and app)	700	0	0
Data curation and submission to ALA	300	0	0
ClimateWatch summary in Earthwatch Annual Report	0	0	0
TOTAL COST FOR LONGTERM, CLIMATEWATCH TRAIL:	\$12,000 ex. GST		
* REDUCED COST FOR EDUCATIONAL / NOT-FOR-PROFIT:	\$4,500 ex. GST		

Costs can be distributed across two years if that is preferred.

Optional services:

- Additional site visit where an Earthwatch staff member attends the trail site to assist with locating and mapping ClimateWatch species, \$200.00/hour ex. GST
- Workshops to train staff or community in ClimateWatch. Entails training by an Earthwatch staff member at the Client's chosen venue and demonstration at the trail location, up to 3 hours, \$600.00 ex. GST
- New ClimateWatch species (upon approval by science advisory panel), tech support and data curation for one species, \$625.00 ex. GST
