

Establishing a ClimateWatch Trail

Thank you for requesting more information on how to establish a ClimateWatch Trail. Non-profit and community groups receive subsidised charges. Please contact us for more information.

Contributions from Earthwatch

Earthwatch provides the following when establishing a ClimateWatch Trail:

Setup:

One ClimateWatch trail created for \$12K (two trails for \$20K). This includes:

1. Set up of ClimateWatch trail materials (webpage, recording sheet, trail-specific field guides)
2. Ability to include 2 additional species per trail (i.e. local species which may not be on the program's monitoring list currently; addition of new species is subject to the Science Advisory Panel approval)
3. Training of staff or community members in the program, so they can engage the community (up to 2 hrs)
4. A communications toolkit to help activate the trails
5. An Earthwatch 'sustainability toolkit' to provide to trail users
6. Information for signage
7. For 2 years: annual trail report provided by Earthwatch
8. If required, one face-to-face site visit to help establish trail sites and identify species

Ongoing:

- Data hosting
- Technology support for ClimateWatch Android and iOS apps and website
- Data validation of ClimateWatch records
- Data submission to Atlas of Living Australia
- Raw data upon request
- ClimateWatch summary in Earthwatch Annual Report

Indicative timeline for development of a ClimateWatch trail is 4 to 6 months.

Contributions from trail coordinators/clients

To support the development and activation of the trails, you would assist in providing the following:

- A high-resolution map detailing the trail area, if available
- A list of the ClimateWatch indicator species which are present along each trail
- Background information for the trail webpage (see bit.ly/cwtrails for examples)
- All appropriate logos, along with specifications for appropriate display of logos
- Signage and markers along the trail

Earthwatch is a not-for-profit organization. All fees are put back into our organisation to help provide free, long-term, accessible citizen science tools and resources for the whole community. We appreciate the support you give us!

ClimateWatch Trail Deliverables 2019-2021	Year 1 2019/2020	Year 2 2020/2021	Ongoing
Site visit up to 2 hours per site to help establish trail and identify species (if required)			
ClimateWatch trail materials <ul style="list-style-type: none"> • webpage • species field guides including ability to add 2 local species* • recording sheet • communications toolkit • Earthwatch sustainability toolkit • Information for signage 			
Training of staff or community members by an Earthwatch scientist in: climate change, citizen science and ClimateWatch monitoring (workshop delivery up to 2 hrs online or F2F)			
Annual report to trail partners			
Technology maintenance , hosting and support (webpage and app)			
Data curation and submission to Atlas of Living Australia			
ClimateWatch summary in Earthwatch Annual Report			
TOTAL COST FOR LONGTERM, CLIMATEWATCH TRAIL:	\$12,000 ex. GST		

Costs can be distributed across two years if preferred.

* Not-for-profit and community groups receive reduced charges (does not include new species or site visits. Ongoing tech costs significantly waived).

Optional services:

- Additional site visit where an Earthwatch staff member attends the trail site to assist with locating and mapping ClimateWatch species, \$200.00/hour ex. GST
- Workshops to train staff or community in ClimateWatch. Entails training by an Earthwatch staff member at the Client's chosen venue and demonstration of the app at a nearby location, up to 3 hours, \$600.00 ex. GST
- New ClimateWatch species (upon approval by science advisory panel), tech support and data curation for one species, \$625.00 ex. GST
