Striped Marsh Frog
*Limnodynastes peronii*

When to look:
*August to April*

**Similar species:**

- Spotted Marsh Frog: has spots rather than stripes on its back.
- Barking Marsh Frog: also has spots rather than stripes on its back.
- Salmon-Striped Frog: has pink-to-orange stripes and lacks the two-coloured iris.

- Two-coloured iris that is golden brown above and dark brown below. White belly which is often flecked with brown.
- Usually a pale stripe running down middle of back. Pale to grey-brown back with darker brown stripes.
- Dark spots and stripes on its limbs. Long, slender fingers and toes have no webbing.
