

Ruby Saltbush

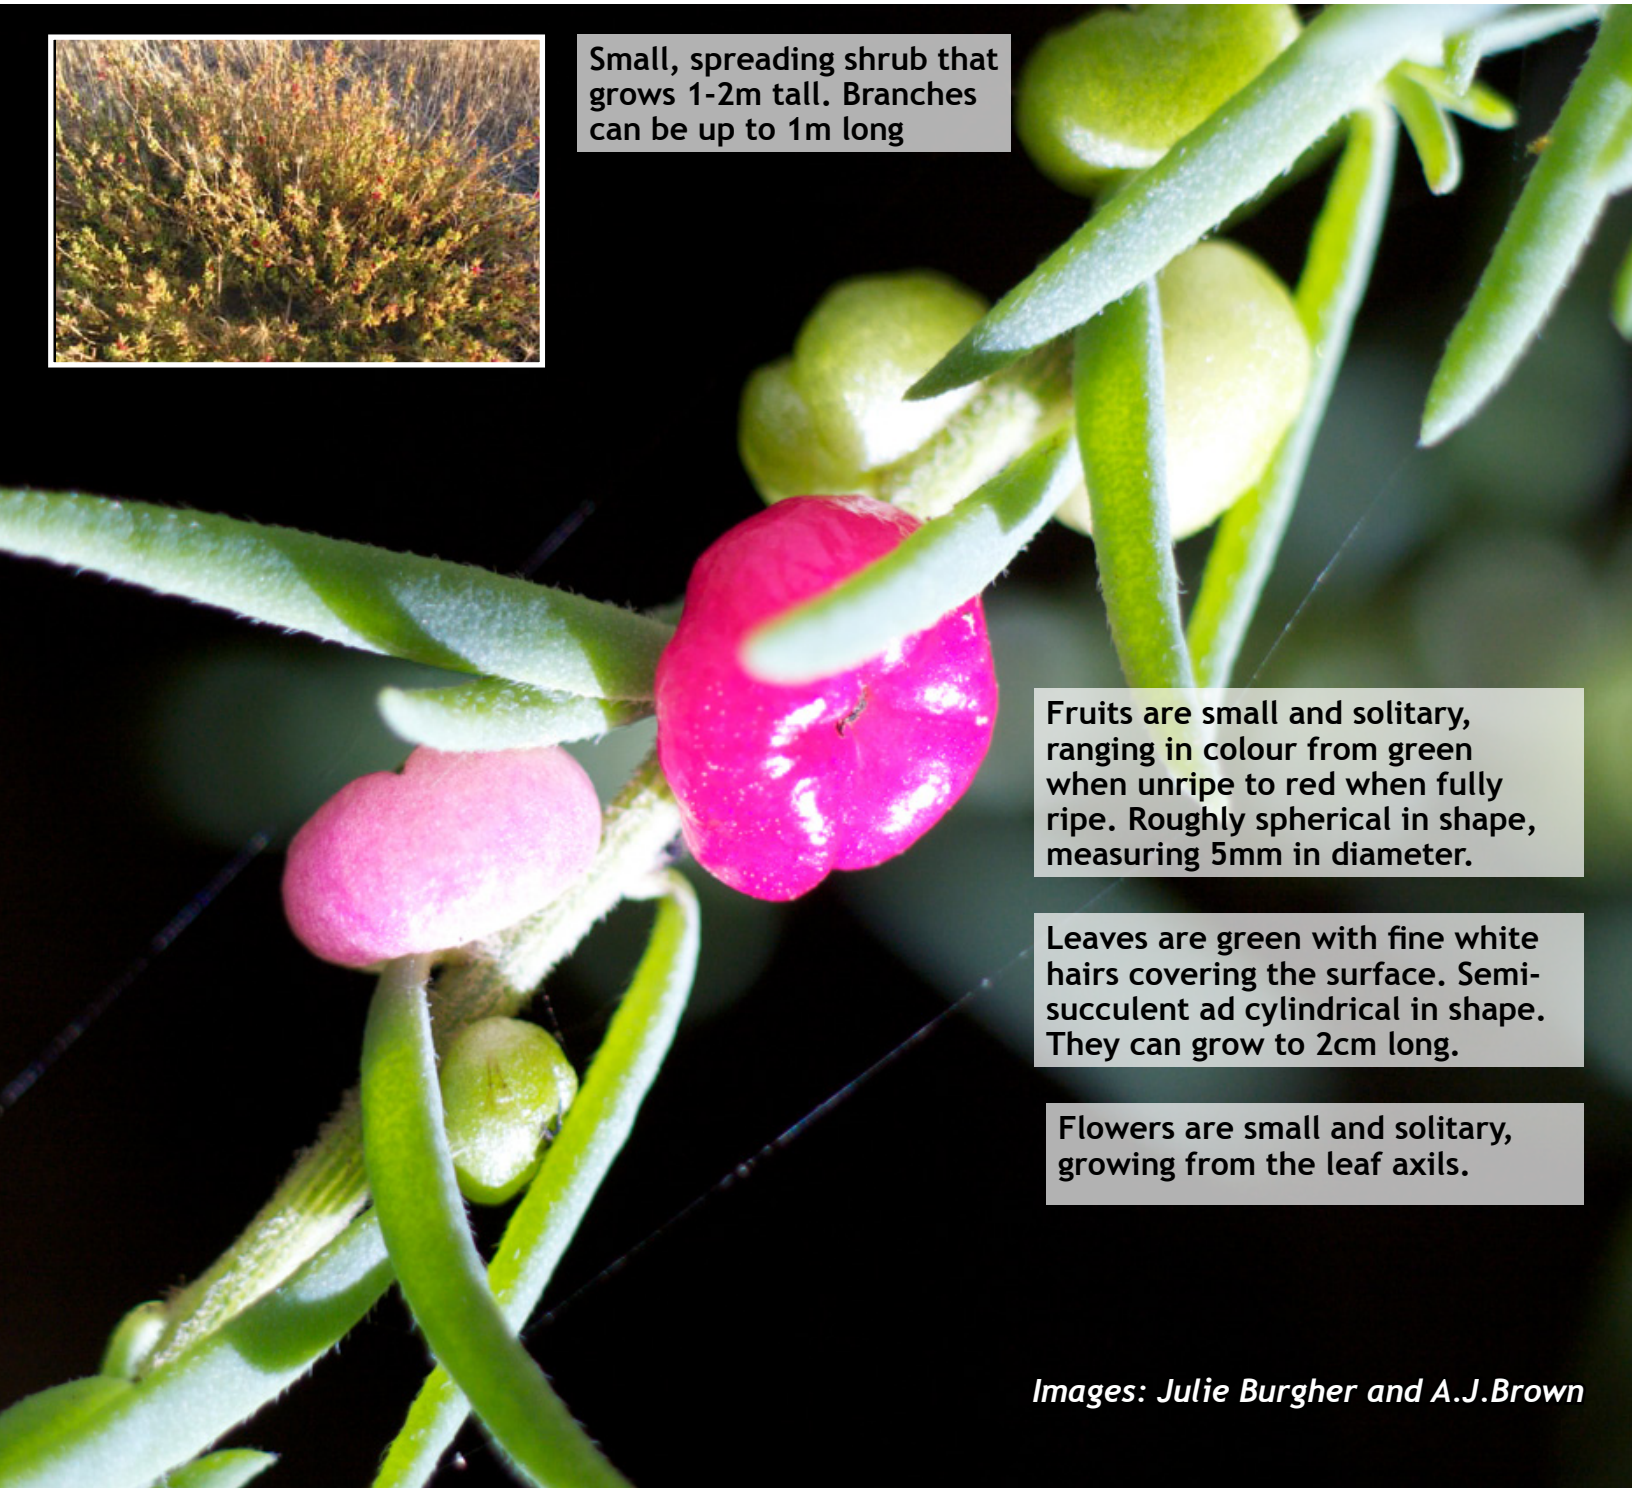

Enchylaena Tomentosa var. Tomentosa

When to look:

Flowering and fruiting occurs year round.

Small, spreading shrub that grows 1-2m tall. Branches can be up to 1m long

Fruits are small and solitary, ranging in colour from green when unripe to red when fully ripe. Roughly spherical in shape, measuring 5mm in diameter.

Leaves are green with fine white hairs covering the surface. Semi-succulent and cylindrical in shape. They can grow to 2cm long.

Flowers are small and solitary, growing from the leaf axils.
