## Nodding Greenhood *Pterostylis nutans*

### **Similar species:**

May be confused with other greenhood orchids (orchids with green flowers) in the same genus. Nodding Greenhood is distinguished by the obvious 'nodding' (downturned) position of the flower.

Single flower 'hood' emerging on a flowering spike 8-30cm tall.

Images: © Neil Blair RBGB VicFlora

**When to look:** Usually flowers May – Oct
